How to update container

ssh nirf@192.168.136.66
Nirf#nirf2025

sudo su
Nirf#nirf2025

cd Nirf_Portal_Frontend_Service
git restore .
git pull
npm install
nano .env

New .env (change port to 3004)

```
NEXT_PUBLIC_API_URL=/api
API_URL=http://localhost:3004
```

npm run build

After successful build

pm2 stop Client
pm2 start Client

cd ..

cd Nirf_Portal_API_Service

git restore .
git pull
npm install

pm2 list

(verify if there is Api Server) (if the name is API something use it)

pm2 stop "API Server"
pm2 start "API Server"
